

2013 September Announcements - WP - West Plains Faculty Senate team

Unknown User (su3)

Reporting an information security breach

If you believe an information security breach has occurred, **report your concern immediately! Don't delay or assume that it is someone else's responsibility. There is no penalty for reporting a suspected breach.** Information Technology Services welcomes your help in keeping University information safe and will respond quickly and confidentially to your report.

Examples of incidents you should report:

Loss or theft of a computer, PDA, or any storage device such as backup media or flash drives which may have contained confidential, sensitive, or personal information

Suspected access or use of confidential information inconsistent with university responsibilities, such as accessing information for personal or unapproved reasons

Accidental exposure of confidential information to those not authorized to receive it

Evidence of suspected attacks against university information systems such as website defacements, possible inappropriate system access, system log files indicating a high number of failed access attempts

Loss of paper records containing confidential information

GrizTXT Messaging System

GrizTXT is a text message system designed to communicate brief announcements/reminders to Missouri State University-West Plains faculty, staff and student subscribers. Texts will be sent to the subscriber's cell phone; text message rates are determined by individual data plans. **(Note: This is NOT the Missouri State Alert that keeps you informed about severe weather and campus closings.)** For information on message categories and how to sign up: <http://news.wp.missouristate.edu/griztxt-messaging-system/>
